

Main Features

Ongoing development of new technology and new features is at the very heart of Danfoss. We want our switches to be among the very best on the market – living up to your expectations.

- **Low differential switching**
Danfoss pressure controls and thermostats have either fixed or adjustable differential settings, good readability, and high accuracy of range setting with use of the scale
- **Designed for various applications**
Danfoss offers a very broad range of purpose-specific enclosures and connections
- **High reliability**
All switches feature high accuracy, repeatability and stability over time
- **Snap action contacts**
All contacts are snap-action, maintaining the contact force until the moment the contact breaks. Units with gold-plated contacts are ideal for low electrical loads while the AgCdO (silver cadmium oxide) contacts are developed for high loads
- **Wide range of approvals**
Danfoss offers a wide range of approvals suited for specific applications and geographical markets
- **High vibration stability**
Outstanding vibration stability in switches ensures flawless operation even in heavy-duty applications
- **Wide pressure ranges**
The programme covers working ranges from -0.9 bar up to 46.5 bar

- **Different sensing elements**
As experts in charging technologies, Danfoss offers temperature switches that operate in a wide temperature range
- **Bellows technology**
The lifetime of the pressure control and thermostat is determined by the quality of the bellows. Using advanced technology and manufacturing processes, and being a world leader backed up by more than 70 years of experience in the industry, Danfoss' bellows are manufactured without any welding points, which make them stress free and completely tight

A world leader in climate and energy technology

The Danfoss Group operates globally with the primary aims of making modern living possible for our stakeholders and being a leader in refrigeration, heating, power electronics, and mobile hydraulics.

We employ 24,000 people and produce approximately 250,000 components each day at our 76 factories in 25 countries.

We promise leadership in our businesses through reliability, excellence, and innovation – driving true customer satisfaction and solutions within climate and energy.

Extensive experience in all key HVAC/R segments

Danfoss plays a leading role in research, development and production in a wide spectrum of industries, and has been a key player in the HVAC/R field for more than 75 years. Our Refrigeration & Air Conditioning Division designs, produces and markets a comprehensive range of automated solutions and compressors for a wide variety of HVAC/R segments, including

- Heat Pumps
- Commercial Air Conditioning
- Residential Air Conditioning
- Commercial Refrigeration
- Household, Light Commercial and Mobile Refrigeration
- Wholesalers & Installers
- Industrial Refrigeration
- Food Retail

Your system will **never be more reliable**, with a control designed for **flawless performance**

Wide range of Danfoss Pressure switches and Thermostats

Pressure switches and Thermostats

Danfoss Pressure switches and Thermostats cover many applications within Refrigeration and Air Conditioning and can be used with all low and high pressure fluorinated refrigerants as well as ammonia and hydrocarbons.

The Danfoss Pressure switches and Thermostats feature either fixed or adjustable differential settings, good readability and high accuracy of range setting with use of the scale. Using advanced technology, and being a world leader, Danfoss controls are manufactured with bellows without any welding points, which make them stress free, completely tight and assure a long lifetime.

Ongoing development of new technology is at the very heart of Danfoss. Our Pressure switches and Thermostats are among the very best on the market – living up to your expectations.

Danfoss components are constructed to perform under the most difficult operating conditions, to monitor your processes and to protect your equipment. Our production utilises state of the art processes and every product is designed on the basis of decades of global experience in Refrigeration and Air Conditioning applications.

Reliable function • High accuracy • Prevents refrigerant loss • Fail-safe function
